

Join the East Berkshire Neurodiversity Network

East Berkshire Neurodiversity network aims to connect people with an interest in Neurodiversity – whether their interest is as a person with lived experience, as parent/carer or other family member, a professional in health, education or social care or as a volunteer.

Everyone with an interest in Neurodiversity is welcome – to join you just need to be aged 18 or older, live or work in East Berkshire and want to improve the understanding of neurodiversity and the support for neurodivergent children and young people.

As a member you will be able to:

- Be part of a change that will benefit countless children, young people and their families
- Link up with people who have a passion for neurodiversity and improving access to support as early as possible
- Access free, on-demand neurodiversity awareness training
- Attend and contribute to network meetings and to the ongoing development of the network
- Learn about and contribute to our transformed approach to understanding and supporting neurodiversity – a pilot being developed in Bracknell Forest

Neurodiversity

Neurodiversity is the concept that neurological differences should be both recognised and respected, in the same way as any other human variation.

Neurodiversity

the diversity of minds – promotes accepting, respecting and celebrating differences

Neurotypical

the majority within the group

Neurodivergent

those falling outside the majority

We look forward to welcoming you to the network
