## Magnets can rip a hole in your child's gut!

- Super strong magnets, like these, can cause serious damage to your child's insides if they swallow them.

- They can join together and make holes in their gut. Removal can be difficult and need complex surgery.

- They can be in toys, jewellery, fridge magnets or cheap products bought from online marketplaces. They can be 10 times stronger than is safe.

⚠️ If your child may have swallowed magnets, don't delay! ⚠️

Call 999 for an ambulance or go straight to A&E. Symptoms can seem like a stomach bug or appendicitis.
