

# Resilience foster carers needed

Thinking about fostering and have experience caring for vulnerable children or young people? Resilience foster care could be for you!

Resilience foster care is a unique fostering opportunity, providing long term, family based therapeutic placements for children and young people aged 5-16 who currently live in residential care, or who without this provision would likely be placed in a residential home.

We'll provide a fostering allowance of up to £750 a week, + a weekly childcare allowance, therapeutic skills training, a dedicated resilience foster carer support group, regular short breaks through respite and more.

Foster with Slough | A Slough Children First Independent Fostering Agency (IFA)
