

SWITCHING ON MINDS

FREE Slough KS2 trips.

Let us inspire and support your classes, Eco Group or School Council. Book a visit to Lakeside Energy from Waste (EfW) Facility and see where we safely and efficiently generate enough electricity to power 56,000 homes.

- Would you welcome expert support with your Eco project work on waste and energy?
- Are you looking to build a real life experience into your cross curricular topic work on recycling, energy and waste – which will inspire and motivate your pupils?

“We all, staff included, have had a lovely and insightful morning. Looking forward to going back to school and seeing what we can do better.”

School Council Lead, Castleview School

“Superb experience and information for the groups – suitable for the youngest and challenging for the older ones. Really interesting. Very many thanks”

Deputy Headteacher, St. Mary's C.E Primary School.

Walk across the drawbridge into the Lakeside Education Centre, which floats like an island in the middle of a lake surrounded by wildlife. It is an opportunity to see nature and it feels like being in the countryside.

- Visit the impressive EfW control room at the heart of the operations and watch the giant grabs in action.
- Uncover new ways to increase and improve recycling and energy efficiency in your school and at home.
- Discover how we transform what can't be recycled into electrical energy.
- Open your eyes to real life applications of classroom science and maths.
- Find out about managing the Earth's precious resources.

You and your pupils will be empowered to become the driving force for sustainable change – both at school and at home!

- Choose a morning or afternoon visit – with free coach travel.
- Our experienced education team can cater for all abilities and needs.
- Receive our detailed guidance pack providing all you need to plan your visit.
